

Artur

Junior Frontend Developer

Lviv, Ukraine | 0636998009 | artur200584bosuj@gmail.com

Profile

Junior Frontend Developer focused on building responsive, clean and fast web pages from Figma layouts. I have practical experience with HTML5, CSS3/SCSS, JavaScript, React and Tailwind CSS, and I am comfortable creating reusable UI components, modals and dynamic page elements.

For this role, I am especially interested in working with landing pages, pre-landing pages and conversion-focused interfaces for affiliate marketing campaigns. I can quickly implement design changes, adapt pages for mobile and desktop, prepare layout variations and improve page structure, responsiveness and loading performance.

Core Skills

Frontend: HTML5, CSS3, SCSS, JavaScript ES6+, React, basic Next.js, Tailwind CSS

Landing pages: responsive layout, mobile-first approach, cross-browser checks, Figma-to-code implementation, reusable components, basic performance optimization

Tools: Git, GitHub, Figma, basic API work, basic MongoDB, basic Amazon S3 and AWS Lambda

Currently learning: WordPress basics, SEO-friendly landing structure, analytics/pixel integration concepts, performance optimization for marketing pages

Project Experience

Personal Frontend Projects

- Built responsive websites and page sections based on Figma designs.
- Created reusable React components and separated UI logic into structured files.
- Implemented modals, interactive elements and dynamic data rendering.
- Practiced working with APIs and displaying data on the frontend.
- Used Tailwind CSS and SCSS to create clean, adaptive interfaces for desktop and mobile.
- Focused on readable structure, accurate spacing, visual consistency and fast iteration on UI changes.

Experience

Trainee / Intern, HebronSoft - Lviv

- Completed an internship program focused on frontend development.
- Worked with real project structure and team workflow.
- Gained practical experience with Git and collaborative development.
- Improved understanding of task-based development, code organization and communication in a team.

Education

Self-taught Frontend Developer

- Studied JavaScript and frontend development independently.
- Completed practical tasks and coding exercises regularly.
- Continue improving React, Next.js and commercial frontend workflow.

Languages

Ukrainian - Native

English - B1, improving

Additional

- Fast learner and motivated to grow in commercial frontend development.
- Comfortable with frequent changes, feedback and quick UI iterations.
- Interested in affiliate marketing, landing page optimization and conversion-focused frontend work.
